

I respectfully request that the FCC reject the National Association of Broadcaster's petition 04-160. Competition in all all areas of communication should open. Satellite radio provides a valuable service for a fee, in lieu of income from advertisers. They should not be artificially restrained in their offerings in order to protect income streams for existing traditional broadcasting media. America is a nation of innovation. Let the innovators inovate and the consumer market decide what is wanted and what is not wanted without market interference from the regulators.

Sincerely,
Frank T. Lane
